## Fujitsu Software BS2000 Service Pack 24.1 - Innovations

### General information about Service Pack 24.1

This document provides information about the innovations in Service Pack 24.1. The functional enhancements are released for BS2000 OS DX V1.0B configurations. An overview of the versions of the BS2000 software products released in the individual configurations is available in the document [Inform Software Configuration BS2000 OS DX V1.0B](#).

The current service pack with the expanded products and revised documentation is displayed on the BS2000 manual server, including a release notice for the service pack.

Detailed information on the new features of the individual products can be found in the corresponding release notices and manuals. As usual, the content of the service pack is described in the delivery letter.

### Innovations with Service Pack 24.1
