

SERVICE & SOLUTION

BS2000 SOLUTIONS

TAILORED AND TARGETED SERVICES AND SOLUTIONS

With BS2000 Solutions, Fujitsu offers standardized solutions and usage scenarios along the entire value chain for Consult, Design & Build services, for an optimal capacity workload and resource balancing of the BS2000 IT-infrastructure.

Our highly qualified people are at your side all the way along the complete value chain of a BS2000 solution, starting with a comprehensive consulting phase, through the solution design process, to implementation. We involve a wide variety of roles in this process, ranging from consultants, to planners, to integrators, so that we can translate your requirements permanently and comprehensively into the BS2000 IT-infrastructure.

As Fujitsu we act as your partner, helping you design and implement solutions tailored to your specific requirements.

Your requirements

- Integration of new BS2000 hardware and software solutions
- Automation of methods of applications and operational workflows
- Consolidation and optimization of BS2000 IT-infrastructures
- Modernization and moves in the BS2000 Data Center
- Design and implementation of high-availability solutions

Your benefits

- Comprehensive consulting services and solutions from a single source
- Access to highly qualified and specialized personnel
- Techn. and organizational competence in the mainframe sector

Brief description of the solutions (partial quantity)

Consulting, inventory and analysis

- Your route to BS2000 Solutions begins with an in-depth consulting which we work with you to carry out an analysis of the current situation

Solution Design

- Design of the complete infrastructure or of dedicated components
- Comprehensive and systematic integration of all vital technological and organizational interfaces to ensure operational requirements are fulfilled

Integration, Test and Initiation

- Performance of load tests as well as of a Proof of Concept (PoC)
- Planning and integration of the new solution (components)
- Documentation, operating manual

Some solution components

Technical consulting and analysis (extract)

- Holding of workshops aimed at a detailed analysis of the requirements
- Inclusion of specialists directly from the development departments

High-availability solutions (extract)

- Design and sizing of the BS2000 IT-infrastructure
- Transitioning of the design concepts into productive operations
- Seamless integration of the HA solution into the existing IT-infrastructure

Integration of hardware and software components (extract)

- Storage management solutions (HSMS, MAREN, ROBAR, SHC-OSD)
- Network solutions (openNet Server, openFT, SNMP)
- Database solutions (DB-Offload, Oracle, SESAM, UDS)

Trainings

- Complete program of training courses and workshops
- At FTS Training Center or as in house trainings

Projekt-Management (Auszug)

- Project planning and realization of complex projects
- Identification of the organizational and technical requirements

Prices, contracts and conditions

- The prices are calculated on a project basis or as fixed prices in accordance with the FTS price list
