

FUJITSU Service BS2000 Security Certification Support

Professional consulting on BS2000 certification according to ISO 27001 based on IT-Grundschatz of BSI and support in implementation of the required measures to achieve ISO 27001 compliance.

Overview of Offering

Description of Offering

The BS2000 systems can be successfully integrated into security audits with their security functions - the BS2000 operating system and security-relevant BS2000 software products contain extensive security mechanisms.

BS2000 security experts take stock to identify vulnerabilities and threats in accordance with the BSI Grundschatz concept for the BS2000 systems. The results are recorded in a catalog of measures to ensure ISO 27001 compliance. The installation of the identified measures can be supported and an IT security concept for the BS2000 systems can be created or revised.

Features & Benefits

- Customized consulting for new and existing customers
- Consulting on customer location
- Identification of vulnerabilities and threats in accordance with BSI Grundschatz
